

**THE NYU SCHOOL OF MEDICINE,
DEPARTMENT OF POPULATION HEALTH PRESENTS:**

INEBRIA 2017

**SCREENING AND BRIEF INTERVENTION AT THE INTERSECTION
OF RESEARCH, POLICY AND PRACTICE: ADVANCING KNOWLEDGE
AND MEETING NEW CHALLENGES**

September 14–15, 2017

NEW YORK, NY

INEBRIA

International Network on
Brief Interventions for
Alcohol & Other Drugs

Generalitat de Catalunya
Public Health Agency of Catalonia
Programme on Substance Abuse

Jointly provided by NYU Post-Graduate Medical School and the International
Network on Brief Interventions for Alcohol and Other Drugs (INEBRIA)

INEBRIA

International Network on
Brief Interventions for
Alcohol & Other Drugs

INEBRIA is an international network of researchers, policy makers, practitioners and other stakeholders interested in the potential of brief interventions in health and other settings to reduce the harms produced by alcohol and other drug use. It aims to provide global leadership in the development, evaluation and implementation of evidence-based practice in the area of early identification and brief intervention for hazardous and harmful substance use. Its objectives are as follows:

1. To share information, experiences, research findings and expertise in the area of early identification and brief intervention for hazardous and harmful substance use.
2. To promote best practice in, and encourage the development of, guidelines for the wide dissemination and implementation of evidence-based early identification and brief intervention for hazardous and harmful substance use.
3. To identify gaps and needs for research in the field of early identification and brief intervention for hazardous and harmful substance use, promote international research co-operation and set standards for research.
4. To promote the integration of the study of brief interventions for hazardous and harmful substance use with the wider context of measures to prevent and reduce substance-related harm.

INEBRIA is supported by a secretariat based at the Health Department of the Government of Catalonia in Barcelona and includes a semi-autonomous branch located in Brazil (INEBRIA–Latina). In addition to regular annual conferences, the network supports NGOs and other bodies in organising and co-sponsoring events and other activities. In addition to meetings, members communicate ideas, request advice, share opinions and new information by means of a Google group, to which it is easy to sign up.

Membership is open to any individual with demonstrated experience in the area of brief interventions for alcohol problems, and to any individual with a bona fide and active interest in conducting research on or implementing in practice substance use brief interventions. Membership is free.

Join INEBRIA by signing up during the conference or visit:

CONGRESS SPONSORS

NIAAA: National Institute on Alcohol Abuse and Alcoholism

NIDA: National Institute on Drug Abuse

World Health Organization

Supported by **R13 AA25541-01** from the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and the National Institute on Drug Abuse (NIDA).

The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services; nor does mention by trade names, commercial practices or organizations imply endorsement by the U.S. Government.

WELCOME FROM THE INEBRIA PRESIDENT

It is wonderful to welcome you to New York City on behalf of INEBRIA. As you will be aware, we are an international network, primarily consisting of researchers, and importantly also including policy makers, practitioners and other stakeholders interested in the potential of brief interventions in health care and other settings to reduce the problems caused by alcohol and other drug use. We aim to provide global leadership in the development, evaluation and implementation of evidence-based practice in the area of early identification and brief intervention for hazardous and harmful substance use.

Our annual conference is the main event for the network and the principal means by which we fulfil our aims and objectives. I am impressed that this year's event has attracted a strong scientific program with internationally important research being presented from across the United States and from across the world.

This year's meeting is held at a time when important questions regarding the effectiveness of screening and brief intervention have been raised, based on several reports of failures to deliver expected outcomes. This calls for renewed efforts for researchers and practitioners to explore new directions. With this in mind, this year's conference theme 'Screening and Brief Intervention at the Intersection of Research, Policy and Practice' is both timely and important.

We are very grateful to NIDA and NIAAA for supporting the conference. We want to thank the local organizers at NYU School of Medicine, and the Scientific Committee for all of their work in crafting a program that promises to be stimulating and of the highest quality.

I hope you will find the conference stimulating and enriching, and that you will continue your involvement with INEBRIA in the years to come.

Sven Andreasson
INEBRIA President

Join us for next year's conference in Chile!

INEBRIA 2018

Challenges faced in the implementation of brief interventions
in diverse settings, contexts and population groups

Santiago, Chile

PRECONFERENCE: September 26, 2018

CONFERENCE: September 27–28, 2018

Organized by MINSAL, Ministerio de Salud (Ministry of Health); SENDA, Servicio Nacional para la Prevención y Rehabilitación del Consumo de Drogas y Alcohol (National Service for Prevention and Rehabilitation on Drugs and Alcohol Consumption); Universidad Católica de Chile.

WELCOME FROM THE LOCAL ORGANIZERS

Welcome to the 2017 INEBRIA Conference and to New York City! On behalf of the local organizing committee, it is our pleasure to welcome you to the 14th annual conference of the International Network on Brief Interventions for Alcohol and Other Drugs.

The theme of this year's conference, "Screening and brief intervention at the intersection of research, policy and practice: Advancing knowledge and meeting new challenges" reflects how INEBRIA members and conference participants are directly taking on the most important current questions in SBI research. Presenters will shed light on a broad range of topics, including how implementation science can inform SBI delivery, addressing unhealthy use of drugs other than alcohol, optimizing the use of technology, and early intervention with adolescents, among many other important areas.

We are very excited to host the first New York City INEBRIA conference at NYU School of Medicine's Department of Population Health. Our Department serves as the academic home to a multi-disciplinary group of scientists focused on bridging the worlds of medical care and public health, and working on interventions to improve the health of populations in New York City and around the globe. Faculty in the Department's Section on Tobacco, Alcohol, and Drug Use work to improve screening and treatment interventions to address substance use in health care and criminal justice settings, and on developing population-level strategies to address substance use. We are active collaborators with the Greater New York Node of the National Institute of Drug Abuse (NIDA) Clinical Trials Network, which has led impactful studies on screening and brief intervention in emergency departments, screening tools for primary care, integration with electronic health records, and optimizing pharmacotherapy for patients with opioid use disorders.

New York is one of the greatest cities in the world, and it is wonderful to gather here with our international colleagues, as well as those from other parts of the U.S. We are particularly pleased that this year's conference has strong representation of researchers from INEBRIA-Latina and the Pan American Health Organization. We look forward to this meeting as an opportunity to network and share experiences from around the world, as well as to enjoy the great diversity of New York City.

We want to sincerely thank our sponsors at NIAAA and NIDA, the Scientific Committee, and the INEBRIA Coordinating Committee for all of their contributions to this conference. We hope that everyone attending will leave feeling enriched by being with us here in New York City.

Jennifer McNeely and **Donna Shelley**
Conference Co-Chairs

WELCOME TO NEW YORK!

When people think of New York City, Manhattan is often the first place they picture. It's no wonder: the borough is home to big-name attractions, such as **Central Park**, the **Empire State Building**, **St. Patrick's Cathedral**, the **High Line** and **One World Observatory**; world-class museums, restaurants and concert halls; and the bright lights of **Times Square** and **Broadway**. But there's more to the borough than the obvious sights. Manhattan contains charming neighborhoods and hidden green spaces, trendy boutiques and classic bars. Read on and explore. (nycgo.com)

Things to Do in New York During Your Stay

Annual San Gennaro Feast—September 14–27, 2017: Annual Feast of San Gennaro. Food, games, rides, concessions, entertainment, a parade, and religious procession occur at this well-loved festival in Little Italy. Indoor and outdoor dining at 35 of Little Italy's most famous Italian restaurants. More than 300 licensed street vendors selling international foods, and souvenirs. Feast of San Gennaro takes place on Mulberry between Canal and Houston; and Grand and Hester between Mott and Baxter. This festival has always been a favorite of New Yorkers.

Visit Brooklyn Botanic Garden—Brooklyn Botanic Garden is an urban botanic garden that connects people to the world of plants, fostering delight and curiosity while inspiring an appreciation and sense of stewardship of the environment. Take in the floribunda roses and *osa pulchra* flowers! While you're there, don't forget to visit Prospect Park. Designed and constructed over a thirty-year period (1865–1895) by Frederick Law Olmsted and Calvert Vaux, the masterminds behind Central Park, Prospect Park has blossomed into a premiere destination for Brooklyn visitors and residents alike.

Take a trip to the Bronx Zoo—Traveling with your children? The Bronx Zoo is the largest metropolitan zoo in the United States and among the largest in the world. It is world-renowned for its large and diverse animal collection, and its award-winning exhibitions. From the African Plains animals to the Himalayan Highlands, there is surely an exhibit for you! Be sure to take the kids to the Nature Trek, a brand new Total Experience exhibit at the Bronx Zoo. Climb and crawl to new heights!

CONFERENCE DINNER

Thursday, September 14th at 6:30 pm

The conference dinner will be held at **State Grill and Bar**, an elegant Empire State Building restaurant. Classic dishes harken back to the way food used to be prepared—from a modern chef's point of view. Guests can watch their food being prepared in the open kitchen by our chefs, who are inspired by the Empire State and its bounty of market ingredients, from the Hudson Valley to the North Fork. Echoing the Empire State Building's striking aesthetics, the interior features a balanced design of art deco and modern architecture.

Empire State Building

Ground
350 5th Avenue
New York, NY 10118

Travel from the conference to dinner is a short 10 minute cab ride or about 20 minutes via subway by taking the B, D or F train from the West 4 Street Washington Sq Station to the 34 Street—Herald Sq Station.

POSTER PRESENTATIONS

1. Difference between gain- and loss-framed ads to attract smokers for a brief web-based intervention for smoking cessation
Nathália Munck Machado, Henrique P Gomide, Heder S Bernardino, Telmo M Ronzani
2. PTSD Influences Receipt of Evidence-based Alcohol-Related Care: A National Study of Patients with Unhealthy Alcohol Use from the U.S. Veterans Health Administration
Jessica A. Chen, Mandy D. Owens, Kendall Browne, Emily C. Williams
3. French GPs obstacles to SBI: a qualitative study
Chloé Cogordan, Raphaël Andler, Viêt Nguyen-Thanh, Pierre Arwidson
4. Attitudes to alcohol screening during pregnancy: the Scottish experience
Lawrence Doi, Ruth Jepson, Helen Cheyne
5. Who are the smokers who seek help online to quit smoking in Brazil? A cross sectional study
Taynara Formagini, Henrique P Gomide, Nathália M. Machado, Rafaela R. Ervilha, Heder S. Bernardino, Telmo M. Ronzani
6. A Computer-Based Brief Intervention to Reduce Substance Use and Risky Sex During Pregnancy
Golfo K. Tzilos, Melissa Plegue, Christopher W. Kahler, Ananda Sen, Caron Zlotnick
7. The roles of heavy drinking and drug use in engagement in care among individuals with uncontrolled HIV infection
Jennifer C Elliott, Lacey Critchley, Daniel J. Feaster, Deborah S. Hasin, Raul N. Mandler, Georgina Osorio, Allan E Rodriguez, Lisa R. Metsch
8. Initiating Extended-Release Naltrexone is Feasible and Acceptable in Frequent Emergency Department Users with Severe Alcohol Use Disorders
Ryan P. McCormack, Mirelis Gonzalez, Dunia Gragui, Joy Scheidell, Gail D'Onofrio, John Rotrosen
9. Reducing Marijuana use among Graduate/ Professional Students Presenting to Student Health Services using eSBI
Tibor P. A. Palfai, Tracie M. Goodness, Michael Winter
10. Emergency Department admission for intoxication is a marker of mental health vulnerability among young adults: a 6-year cohort study
Angeline Adam, Mohamed Faouzi, Bertrand Yersin, Jennifer McNeely, Jean-Bernard Daepfen, Nicolas Bertholet
11. Enhancing Interest in Substance Use Disorders Research: Evaluation and Dissemination of the SARET Program
Kathleen Hanley, Sewit Bereket, Ellen Tuchman, Madeline Naegle, Frederick More, Jennifer McNeely, Marc N. Gourevitch
12. Student Feedback on Web Based Screening, Brief Intervention, and Referral to Treatment Program
Adam C. Brooks, Carolyn M. Carpenedo, Jonathan Dayan, Marisa Aurora, Joanna Adely, Chase Deutsch
13. Online SBI Training for Diverse Health Professional Trainees
Richard L. Brown, Matt Guerrieri, Mia D. Croyle, Jade Goetz

14. The Intersection of Youth, Violence and Risky Drinking: A Quantitative and Qualitative Study of Violence Brief Counseling Intervention at a US Level I Hospital Trauma Center
Leigh Zick Dongre, Olivia H. Currin, Elizabeth Bost White, Laura J. Veach, Preston R. Miller, Regina R. Moro
15. Homelessness and housing instability among emergency department patients who screen positive for unhealthy alcohol or drug use: a challenge for ED-based SBIRT
Evan Gerber, Kelly M Doran, Ryan P. McCormack, Donna Castelblanco, Donna Shelley, John Rotrosen, Lillian Gelberg
16. A systematic review of interventions targeting alcohol intake with patients with cancer
Gillian Waller, Grant J McGeechan, Dorothy Newbury-Birch, Natalie Connor, Jennifer Ferguson, Emma L Giles
17. Alcohol consumption screening tools in predicting NCDs risk factors
Chaisiri Angkurawaranon, Nalinee Jakkaew, Kanokporn Pinyopornpanish, Wichuda Jiraporncharoen, Anawat Wisetborisut, Surin Jiraniramai, Chaisiri Angkurawaranon
18. Training in Screening and Brief Intervention: The Role of Social Workers' Attitudes Towards Evidence-Based Practice
Cali-Ryan R. Collin, René Carapinha, Kimberly H. M. O'Brien, Jennifer M. Putney, Adele Levine
19. Identifying risk of cannabis use disorder through quantitative criteria
Hugo López-Pelayo, Cristina Casajuana Kögel, M Mercedes Balcells-Olivero, Antoni Gual Solé
20. Depression among smokers of Viva sem Tabaco, a web-based intervention for quit smoking: a cross sectional study
Henrique P Gomide, Nathália M. Machado, Rafaela R. Ervilha, Taynara Formagini, Heder S. Bernardino, Telmo M. Ronzani
21. Screening, Brief Intervention and Referral to Treatment (SBIRT) Training in Medical Professional Programs: Implementation and Dissemination
Gail D'Onofrio, Shara H. Martel, Michael V. Pantaloni, Jeanette Tetrault, Todd W. Rofuth, William Rowe, Diane E. Michaelson, Jaak Rakfeldt, Uchenna T. Nwachuku, Louisa L. Foss-Kelly
22. Screening and Brief Intervention with Low-Income Youth and Young Adults in Community-Based Settings
Mary F. Brolin, Helen Whitcher, Sharon Reif, Shahara Jahgoo, Patrick L. McNeil
23. How alcohol screening and counseling should be done? Attitudes of social work professionals and their clients
Elina Renko
24. Psychosocial aspects associated with Alcohol consumption: a comparison of pregnant women
Larissa Horta Esper, Erikson F. Furtado
25. Psychometric properties of screening, brief intervention, and referral to treatment (SBIRT) training outcome measures to evaluate an online simulation training
Weiwei Liu, Tracy L. McPherson, Hildie Cohen, Dawn L. Lindsey
26. Assessing the impact of mode of delivery and training hours on screening and brief intervention proficiency using a web-based simulated patient
J. Aaron Johnson, Yunmi Chung, Megan Hicks, Katherine Covington, Deborah Macmillan, J. Paul Seale

27. Telephone counseling and text messaging for supporting post-discharge quit attempts among hospitalized smokers in Brazil: a feasibility study
Erica Cruvinel, Kimber P Richter, Fernando Colugnati, Telmo M. Ronzani
28. Binge Drinking Characteristics of Latino Emergency Department Patients with Unhealthy Drinking
Federico Vaca, Jesse Reynolds, James Dziura, Allen Hsiao, Craig Field, Michael Pantalon, Fuad Abujarad, Gail D'Onofrio
29. Exploring the practices and attitudes of GPs in the delivery of ABIs in Scotland: a qualitative study
Aisha S Holloway, Eric Carlin, Eddie Donaghy
30. Brief interventions to alcohol users in primary care context: results of a pragmatic trial
Sara Pinto Barbosa, Camila Alvares, Margarita Antonia Villar Luis
31. Comparison of Characteristics in Latino Patients Completing the Alcohol Use Disorder Identification Test in the ED
Federico Vaca, Jesse Reynolds, James Dziura, Allen Hsiao, Craig Field, Michael Pantalon, Fuad Abujarad, Gail D'Onofrio
32. Factors Associated with Sustained Alcohol Screening and Assessment for Alcohol Use Disorders after Active Implementation in Three Primary Care Clinics
Amy K. Lee, Emily C. Williams, Julie E. Richards, Carol E. Achtmeyer, Evette J. Ludman, Paula Lozano, Ryan M. Caldeiro, Rebecca L. Parrish, Katharine A. Bradley
33. Effect of breathalyzer testing and brief interventions in preventing drink-driving during academic parties
Tereza M. Barroso, Diogo Marques, Jimmy Martins, Tiago Silva
34. Screening and brief interventions for reducing hazardous and harmful drinking among Portuguese older people
Tereza M. Barroso, Carla Susana Monteiro, Linda Samanta Fernandes
35. Identifying Needs, Gaps, and Opportunities in Social Work and Nursing Curriculum to Integrate Adolescent SBI Education
Dawn L. Lindsay, Tracy L. McPherson, Piper Lincoln, Holly Hagle, Sabrina Bauroth, Anna Schlissel, Hannah Joseph
36. Consumption of psychoactive substances in tuberculosis patients: interface to adherence to treatment and brief intervention
Sonia Sueli S. Espirito Santo, Angela M.M. Abreu, Luciana Fernandes Portela
37. Comparison of brief individual and group intervention for alcohol users: First results
María V. Luna Cañas, Leticia Echeverría SanVicente
38. Group with family of pharmacodependents in a service of attendance to the workers of a general hospital
Marcella B. A. Abdalla, Natália A. Antunes, Erikson F. Furtado
39. Integrating online patient simulation of screening and brief intervention in social work curricula
Jennifer M. Putney, Adele A. Levine, Kimberly H. M. O'Brien, Cali-Ryan Collin
40. The effect of Brief Intervention in reducing problem alcohol use among employees of a university
Riany Moura Rocha Brites, Angela M. M. Abreu

41. Screening for Adolescent Alcohol and Other Drug Use by Thomas Jefferson University Hospital Providers: Barriers and Recommendations
Emily B. Lambert, Russell McIntire, James Plumb
42. Implementation Pilots in Primary and Behavioral Healthcare Settings
Reid K Hester, William Campbell
43. How Health Professional Associations Can Become the Standard-Bearers for Alcohol Screening and Brief Intervention
Diane K King, Susan I. Rawlins, Beth M. Kelsey, Marilyn Pierce-Bulger, Bridget L. Hanson
44. An online alcohol SBI training course designed to motivate change in practice behaviors
Leigh E. Tenkku Lepper, Lara N. Oakley, Catherine M. Link, Debra J. Sprague, Abdelmoneim A. Elfagir
45. CDC grant efforts to promote the implementation of alcohol SBI as a component of fetal alcohol spectrum disorders prevention
Lela R. McKnight-Eily, Elizabeth P. Dang
46. FASD Practice and Implementation Centers and National Partnerships: Overview of a Comprehensive, Collaborative Prevention Effort
Sandra J. Gonzalez, Alicia A. Kowalchuk, Roger J. Zoorob
47. An Interprofessional Approach to Implementing Alcohol SBI: The Texas High Impact Project
Alicia Kowalchuk, Sandra J Gonzalez, Carolyn Edney, Tobie Barton, Nancy A. Roget, Roger Zoorab
48. Collaboration with the American Association of Colleges of Nursing and the CDC Workforce Improvement Project
Ann M. Mitchell, Deborah Finnell, Christine L. Savage, Kathy Puskar, Irene Kane
49. Leading horses to water and hoping they don't drink
Karen L. Steinberg, Janice Vendetti, Bonnie McRee, Katherine Robaina
50. Adapting the AUDIT to National Standards: The USA Case Study
Thomas Babor, Katherine Robaina, John Higgins-Biddle
51. The ASSIST-FC: Reliability and validity of a two-question version of the World Health Organization's Alcohol, Smoking and Substance Involvement Screening Test
Janice Vendetti, Bonnie McRee, Thomas Babor, Miranda Lynch
52. A Qualitative Study of the Factors that Impact SBIRT Workflow Processes
Manu Singh, Lauren Eckert, Erika Tait
53. The Development of a Nurse Champion Model to Promote Alcohol Screening and Brief Intervention (ASBI)
Dawn Lindsay, Holly N Hagle, Ann M. Mitchell, Kathryn R. Puskar, Irene Kane, Emily Knapp
54. Factors Affecting Health IT Integration for Screening, Brief Intervention, and Referral to Treatment (SBIRT) Service Delivery
Laura H. Marcial, Cynthia M Throop, Michelle L Dougherty, Erin L Mallonee, Barbara L Massoudi
55. Profile of Brazilian users of a web-based Brief Intervention to reduce alcohol associated problems
Maria Lucia O. Souza-Formigoni, Andre Luiz Monezi Andrade

PLENARY SPEAKERS

Sharon Levy, MD, MPH

Director, Adolescent Substance Abuse Program (ASAP)

Boston Children's Hospital

Associate Professor of Pediatrics, Harvard Medical School

Sharon Levy, MD, MPH is a board certified Developmental-Behavioral Pediatrician and an Associate Professor of Pediatrics at Harvard Medical School. She is the Director of the Adolescent Substance Abuse Program (ASAP) in the Division of Developmental Medicine at Boston Children's Hospital, which is comprised of clinical, research, training and policy arms. She has evaluated and treated thousands of adolescents with substance use disorders, and has taught national curricula and published extensively on the outpatient management of substance use disorders in adolescents, including screening and brief advice in primary care, the use of drug testing and the outpatient management of opioid dependent adolescents. She is the immediate past chair of the American Academy of Pediatrics Committee on Substance Use and Prevention, the President Elect of the Association for Medical Education and Research in Substance Abuse (AMERSA) and serves on the board of directors of the Addiction Medicine Fellowship Director's Association.

Katharine Bradley, MD, MPH

Senior Investigator, Kaiser Permanente (KP)

Washington Health Research Institute

Katharine Bradley, MD, MPH is a general internist and health services researcher who, for over 25 years, has conducted research focused on improving alcohol- and drug- related care in medical settings. She is a Senior Investigator at Kaiser Permanente (KP) Washington Health Research Institute as well as Affiliate Professor of Medicine and Health Services at University of Washington and Associate Investigator at Veterans Affairs (VA) Puget Sound Health Care System, all located in Washington State, United States. Her research funded by VA, NIAAA, and NIDA has included: validation of the 3-item AUDIT-C; collaboration with VA clinical and quality leaders to implement alcohol screening and brief alcohol interventions in over 900 VA sites nationwide; the recently completed CHOICE trial of nurse care management for alcohol use disorders (AUDs); a pilot study of screening for cannabis and drug use in primary care; and a study developing a patient decision aid for people with AUDs. Ongoing alcohol-related research includes the AHRQ-funded SPARC implementation trial—implementing Sustained Patient-centered Alcohol-Related Care across 25 primary care clinics in Kaiser Washington and an NIAAA K24 Mid-career Mentoring Award focused on integrating mobile health tools for AUDs into primary care. Dr. Bradley is also a multiple PI, along with Drs. Weisner and Campbell, for the Health Systems Node of the NIDA Clinical Trials Network (CTN). She is currently leading the PROUD trial—an implementation trial of collaborative care for opioid use disorders for the CTN—and co-leading with Dr. Lapham a descriptive CTN study of medical cannabis use among KP Washington primary care patients.

Frederick Muench, PhD

President and CEO, Partnership for Drug-Free Kids

Frederick Muench, Ph.D. is the President and CEO of the Partnership for Drug-Free Kids. He is a clinical psychologist who specializes in developing remote coaching and mobile interventions to help individuals and families prevent and intervene with problem alcohol and substance use. He has been funded to build, test and disseminate digital interventions from NIDA, NIAAA and most recently, in collaboration with Cornell Tech, is the PI on a Robert Wood Johnson Pioneer grant to study self-regulation in the general population using Research Kit (Apple) and Research Stack (Android) in order to prevent impulsive responding. Fred is also an adjunct at the NYU Interactive Telecommunications Graduate Program (ITP) where he teaches a graduate class entitled, Crafting Mindful Experiences with Technology He will discuss the opportunities and problems with digital interventions for problem drinking.

Thomas Babor, PhD, MPH

Professor and Chairman, Department of Community Medicine and Health Care
University of Connecticut School of Medicine

Thomas Babor is a Professor and Chairman in the Department of Community Medicine and Health Care, University of Connecticut School of Medicine. He holds the University's Physicians Health Service endowed chair in Public Health and Community Medicine. He received his doctoral degree in social psychology from the University of Arizona, spent several years in postdoctoral research training in social psychiatry at Harvard Medical School, and subsequently received a master of public health degree in psychiatric epidemiology from the Harvard School of Public Health. His research interests include screening, diagnosis, early intervention, and treatment evaluation, as well as alcohol and drug policy. He has worked with the World Health Organization on the development of Alcohol Use Disorders Identification Test (AUDIT) and the Alcohol, Substance Involvement Screening Test (ASSIST). He is Editor-in-Chief of the *Journal of Studies on Alcohol and Drugs*. He is a co-author of *Drug Policy and the Public Good* (2010) and *Alcohol: No Ordinary Commodity—Research and Public Policy* (2010). Both books were awarded a first prize in the public health category of the British Medical Association's book competition.

Simon Gilbody, MB, PhD, FRCPsych

Professor of Psychological Medicine and Health Services

Research Department of Health Sciences University of York, UK

Simon Gilbody graduated in Medicine from the University of Leeds in 1991. Thereafter he trained as a psychiatrist, cognitive behaviour therapist, population scientist and health services researcher. He was appointed full Professor at the University of York in 2006. As Director of the York Mental Health and Addiction Research Group (MHARG) he leads a vibrant group of 35 applied health researchers. The overarching aim of his group's research programme is to ensure that publicly-funded mental health and addiction care is effective, efficient and equitable. He focuses his activity on population approaches to mental health, and directs his activity to primary care; since this is where most psychological ill health presents and is managed.

Professor Gilbody leads large scale trials of brief behavioural interventions that can be delivered at scale for common psychological health problems. His recent work on the management and prevention of depression amongst older people (the CASPER trial) is now entering the public domain. The first results were published in JAMA in early 2017 (doi:10.1001/jama.2017.0130). He will speak about the strengths and limitations of brief behavioural interventions to improve population health, and will reflect on the economic dimension of research, for which York holds an international reputation.

Walter Cullen, MB, MICGP, MRCGP, MD, Grad Dip T&L

Full Professor of Urban General Practise

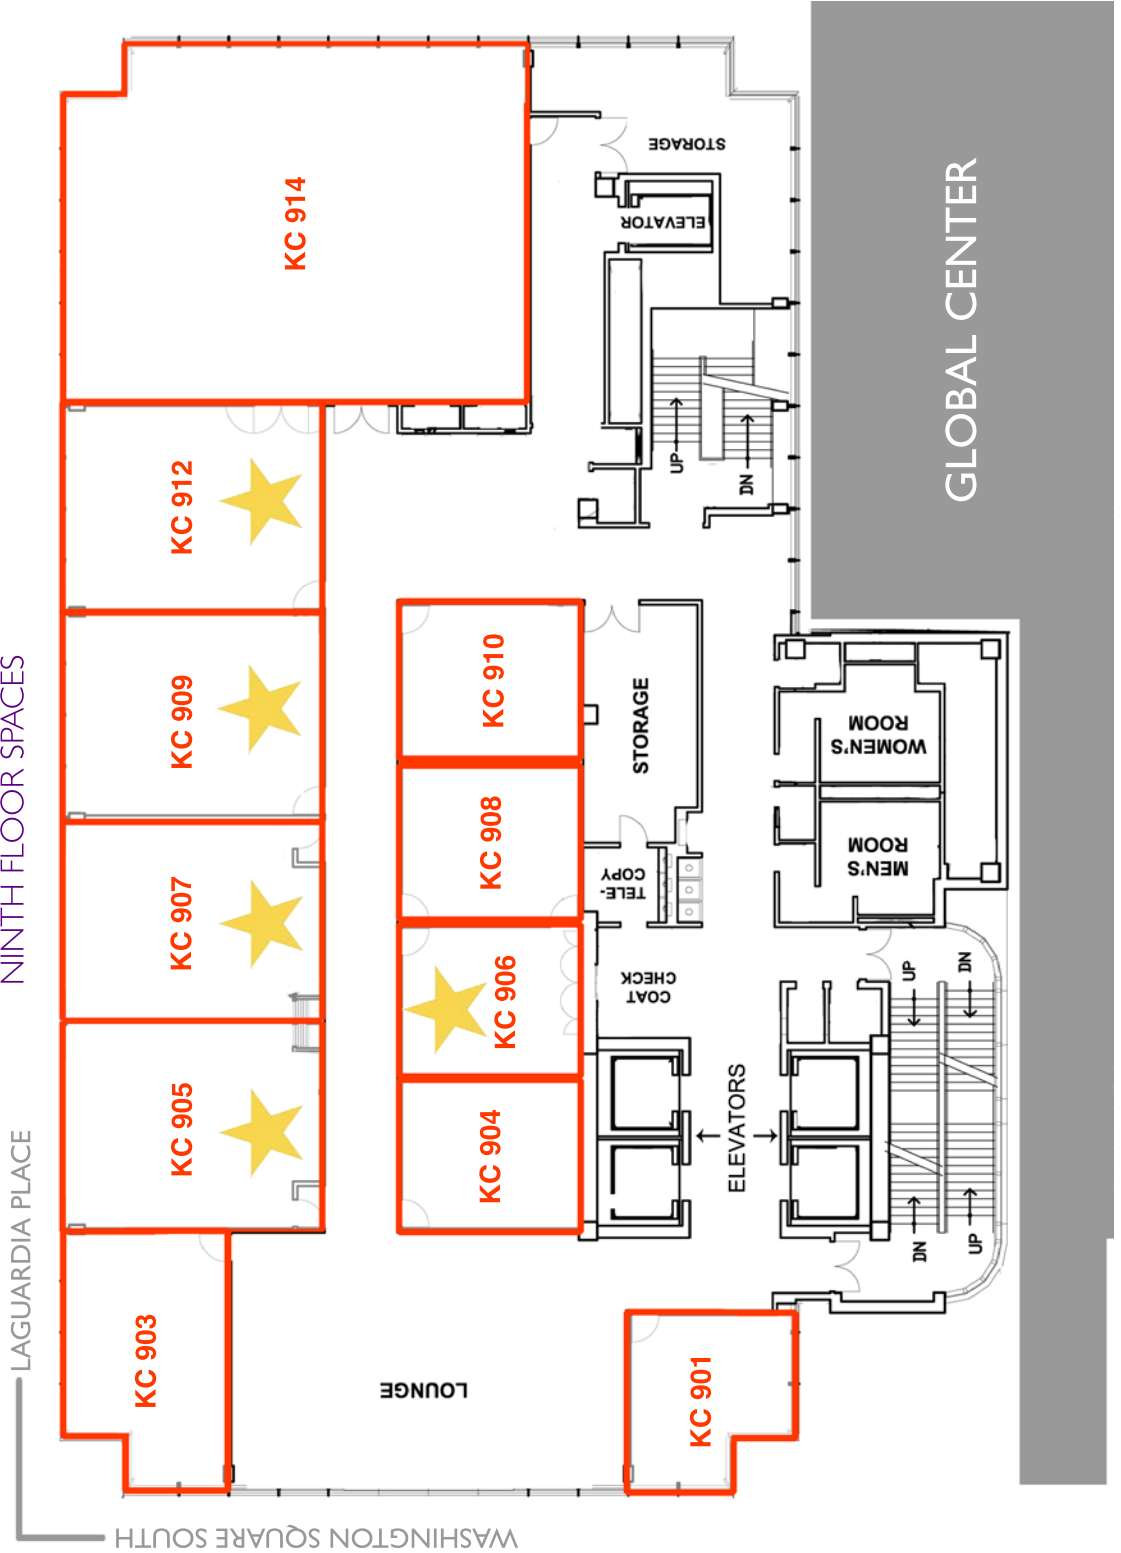

Walter is a Family Physician in Dublin, Ireland and a Professor of Urban General Practice at the School of Medicine in University College Dublin. His research focuses on how we can best enhance primary care - and its interface with secondary care, to improve health outcomes for people who experience mental health and substance use problems. With collaborators in Ireland's Health Services Executive, colleagues in primary and secondary care, service user representatives and international experts, this research has realised in excess of 150 peer reviewed publications and €5m in research funding. Currently the group is working on projects examining a) how we can enhance alcohol brief intervention for people who use illicit drugs projects and b) how we can improve access to hepatitis C treatment for this group. He is also Academic Lead for the Primary Care Research Group and Director of Quality Improvement at the School of Medicine at UCD.

CME DETAILS

Target Audience

INEBRIA will convene researchers, practitioners, and policymakers with an interest in alcohol and drug use research, particularly focused on screening and brief interventions (SBI). The conference will provide a forum to hear from leaders in the field about evidence-based SBI approaches, as well as new research and practice developments in the field.

Course Description

The 2017 INEBRIA meeting, the theme of which is 'Screening and brief intervention at the intersection of research, policy and practice: Advancing knowledge and meeting new challenges' will be held in New York, NY September 14–15, 2017. The meeting includes a welcome reception the evening of September 13, followed by two days of research presentations. The overarching goal of this INEBRIA research conference is to present findings from, and promote further development of, screening and brief intervention (SBI) research, with a particular focus on implementing and scaling up what works, and finding new approaches to addressing unhealthy alcohol and drug use that are feasible, effective, and sustainable.

Statement of Need

Implementation science is a key area that needs to be integrated more fully into SBI research. Implementation science principles can be applied to illuminate why some SBI initiatives have not achieved their goals, and to guide future SBI interventions toward feasible and sustainable approaches.

- Clinicians treating patients with unhealthy substance use problems need to develop greater integration between substance use and mental health/behavioral health research and practice. This will result in better management of comorbid conditions.
- Practicing clinicians need to be aware of the advantages of technology-based or electronic brief interventions in order to provide optimal care to their patients.
- SBI in adolescents shows great promise as an early intervention approach.

Educational Objectives

After participating in this activity, clinicians should be able to:

1. Integrate principles of SBI-related implementation science into their research and/or clinical practice
2. Identify key elements of brief mental health interventions, and develop strategies for addressing comorbid mental health and substance use conditions and concurrent use of drugs and alcohol
3. Identify how electronic SBI interventions can be conducted, and utilize the potential applications of electronic SBI
4. Summarize this fast-moving area of research, to evaluate and discuss what works based on current evidence, and to chart the next phase of research

Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the NYU Post-Graduate Medical School and the International Network on Brief Interventions for Alcohol and Other Drugs (INEBRIA). The NYU Post-Graduate Medical School is accredited by the ACCME to provide continuing medical education for physicians.

CME Credit Designation Statement

The NYU Post-Graduate Medical School designates this live activity for a maximum of 14.75 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosure Statement

The NYU Post-Graduate Medical School adheres to ACCME accreditation requirements and policies, including the Standards for Commercial Support regarding industry support of continuing medical education. In order to resolve any identified conflicts of interest, disclosure information is provided during the planning process to ensure resolution of any identified conflicts. Disclosure of faculty and commercial relationships as well as the discussion of unlabeled or unapproved use of any drug, device or procedure by the faculty is listed on the following page.

Mission Statement

The NYU Post-Graduate Medical School is committed to training physicians to provide excellent care of patients through life-long continuing medical education of the highest quality. Our overall goal is to enhance clinical competence and performance, and, where possible, improve patient outcomes.

DISCLOSURE SUMMARY

NYU Post-Graduate Medical School FULL DISCLOSURE POLICY

Disclosure Summary as of August 27, 2017.

For a complete list, please visit <https://app.2shoes.com/2360>

It is the policy of the NYU Post-Graduate Medical School to insure balance, independence, objectivity, and scientific rigor in all its individually provided or jointly provided activities. Because CME activities are conducted in the public interest, it is important to assure the public that education received by physicians and other health care professionals through whom patient care decisions are made is conducted with the highest integrity, scientific objectivity and in the absence of bias. A conflict of interest exists when individuals have both a financial relationship with a commercial interest and the opportunity to affect the content of CME about the product or services of that commercial interest.

The Accreditation Council for Continuing Medical Education (ACCME) holds providers of CME responsible for collecting information from its instructors, planners and managers of CME content and resolving those conflicts prior to the commencement of the CME activity. The intent of the conflict of interest resolution process is to assure that provider, faculty and planner financial relationships with commercial interests and resultant loyalties do not supersede the public interest in the design and delivery of continuing medical education activities for the profession.

The following have indicated whether or not they have received financial support for consultation, research or evaluation, have a financial interest relative to their presentation or will include the discussion of the unlabeled or unapproved use of a drug, device or procedure:

CME CREDIT INSTRUCTIONS

After the course, please follow the below instructions in order to claim credit and print out your certificate.

1. Go to **www.highmarksce.com/nyumc**
2. Type in the login information that you used when you registered.
 - a. If you did not register online and have never logged into our website before, go ahead to the 'Non-NYU Langone Health Login' section and click the 'Get it now!' link located below the sign in button.
 - i. Enter your first and last name along with your email address in the appropriate fields. Please make sure to use the same email address you used in the registration form.
 - ii. A link will then be sent directly to your email. You will be able to reset your password. Please note that the link expires 90 minutes after you receive the email.
 - b. For all NYU Langone Health faculty and staff, please use your current NYU Langone login in the 'NYU Langone Health User Community Login' section.
3. Click 'My Credits' tab on the right.
4. Select the activity—**INEBRIA 2017** and click **'List Sessions by Activity.'**
5. Select 'Attest' for the sessions that you attended (where applicable) and click 'Submit.'
6. Select the appropriate number of hours commensurate with your attendance for each session, certify, and submit.
7. In order to print/download your certificate you must complete the evaluation.
 - a. Click 'Complete Evaluation,' complete this evaluation, and submit.
8. Click 'Print Certificate' and select the type of credit you will be claiming.
9. You can choose to print or save your certificate.
10. You will be able to access this certificate in the future via the 'My Credits' tab using the link above.

If you have any questions, please email cme@nyumc.org or call 212-263-5295 for assistance.
