Blair County SBIRT Project

Program Evaluation and Research Unit

with

Blair Department of Drug and Alcohol

Partnering for Health Services

Altoona Family Physicians

Jan Pringle, PhD
Sherry Rickard-Aasen
September 24, 2015

Funding Provided By:
Pennsylvania Commission on
Crime and Delinquency

SBIRT Project Objectives

Reduce the impact of substance use disorders on the community and criminal justice system by implementing SBIRT in two local clinics to:

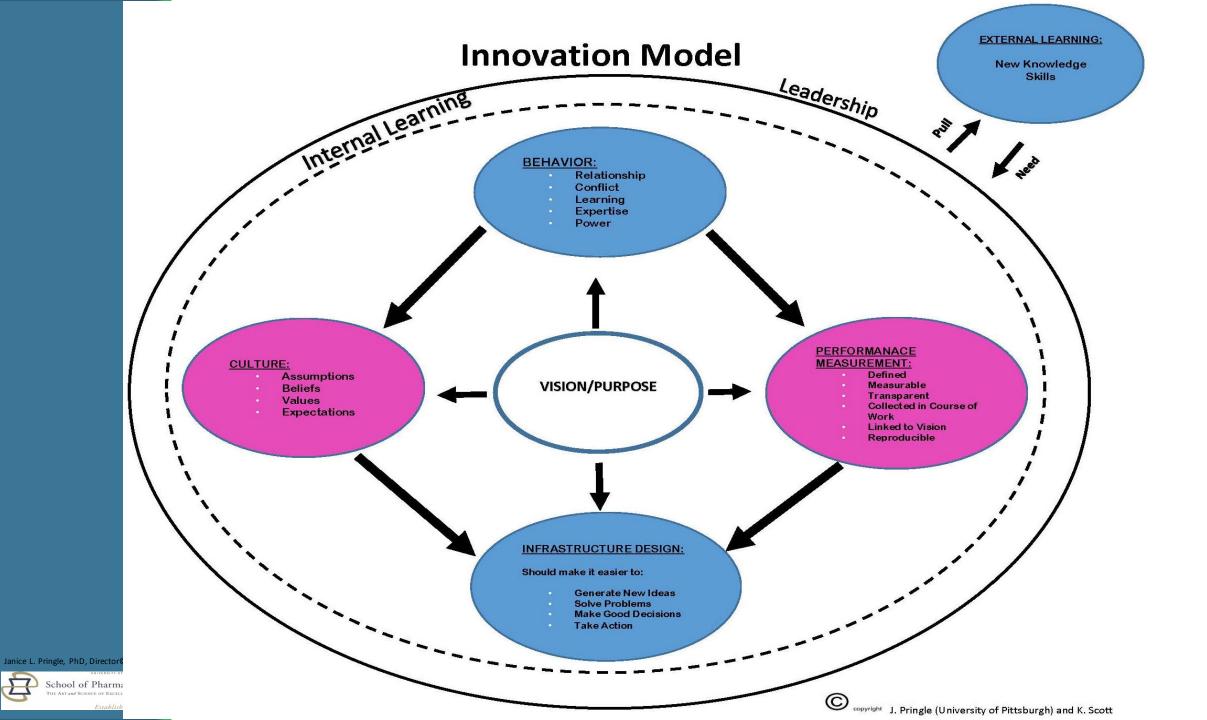

Improve early identification

Employ effective interventions

Innovation

LEADERSHIP

Cultural Readiness
Structural Readiness
Performance Measurement
Behavior Acclimation

Project Vision

"Every Blair County provider ensures that each patient receives <u>proper</u> and <u>timely</u> alcohol and substance abuse prevention, screening and treatment service to attain the lowest rate of addiction in Pennsylvania."

Innovation Challenge Perfect IMPLEMENTATION Present Not Present

Values and Beliefs

Role of the Champion

Understand Innovation Implementation Principles

Build support from staff and leadership

Oversee site training plan and implementation

Ensure collection of performance measurements

Connect to local D&A programs

Sustain Staff Morale

Cultural Readiness

"SBIRT is relevant to my responsibilities and will benefit patients."

"Empowered through knowledge and skill practice."

"Competency will improve with implementation and experience and additional education will further knowledge and skill with."

"Will use SBIRT practices and leadership will support."

"Generally - prepared and willing."

Staff Training

- 2 Champions
- 20 Providers
- 13 Clinical Staff
- 22 Residents

Structural Readiness

- Highly specified protocol
- Clearly defined linkages between systems
- Starting small with Big plans
- Workforce engagement

Protocol Development

Environmental "Fit"
Comprehensive
Clear, Precise
Communicated

Performance Measurement

- Define quality metrics
- Establish Thresholds
- Continuous Review
- Share results

Performance Measurement

for Partnering for Health Services (PHS) and

Altoona Family Physicians (AFP)

Total Patients Screened

PHS

AFP

SCREENING	PHS	
Total # Screened	118	
New patients this period	119	
New patients NOT Screened	1	
Established Patients	0	

SCREENING	AFP
Total # Triage Screened	266
New patients this period	282
New patients NOT Screened	16
Established Patients	0

PHS and AFP SBIRT Screening Results

SCREENING RESULTS	PHS	AFP
ALCOHOL	48	26
Need Low Intensity Interventions	38	20
Need Moderate Intensity Interventions	8	3
Need High Intensity Interventions	2	3
DRUG	16	25
Need Low Intensity Interventions	3	17
Need Moderate Intensity Interventions	10	5
Need High Intensity Interventions	3	3
IN TREATMENT/RECOVERY	4	2

SBIRT exposed problematic substance use that might previously have gone unnoticed.
Opportunities presented

to improve patient care.

Referral to Treatment

REFERRAL TO TREATMENT	PHS	AFP		
# Scheduled at BDAP	5	0		
# Assessments completed	4	0		
# Admitted to Treatment	2	0		
# in Tx >3 Days/Visits	2	0		
# Engaged 90+ Days	0*	0		
*At the time of this way and OO down have not also and				

^{*}At the time of this report, 90 days have not elapsed.

communication kept patients engaged in the process even when confronted with obstacles (incarceration, social issues, treatment gaps)

PHS and AFP Threshold Analysis

THRESHOLD ANALYSIS	Target	PHS	AFP
Screening Threshold	>80%	99%	94%
Brief Intervention Threshold	>80%	111%*	67%
Brief Intervention Expectation	>15%	17%	12%
Patient Accepts Referral	10%	71%	N/A
PHS Referred/BDAP Scheduled	100%	100%	N/A
Referred by Clinic/BDAP Assessed	50%	80%	N/A
Assessed BDAP/Admitted to Tx	50%	50%	N/A
% in Tx (LOC ≥ 3 Days or Visits)	50%	100%	N/A
% Engaged in Tx (90+ Days or Visits)	50%	0%†	N/A

^{*}Exceeds 100% due to patients who received a "Low Risk" ASSIST score but deemed appropriate by the provider to receive a Brief Intervention

Continuous tracking of SBIRT activities and weekly reporting of Quality Metrics helped target areas for improving patient care

[†]At the time of this report, 90 days have not elapsed.

Project Evaluation

- Training evaluations
- Satisfaction with implementation
- Continuous examination and deliberation of protocol and implementation

Did we meet objectives?

Did we innovate well?

Behavioral Indicators

Culture shift

Community connections

Champions alert

Stories of disappointment and hope

Collaborator Learnings

SBIRT is a preventative measure

Opportunities exist to improve patient care

Mutual increases in understanding between two systems

Outcomes benefited from staff preparation and involvement

Documentation of activity necessary to gauge progress toward vision

Celebrate success!

Project Lessons

- Increasing complexity of systems increases innovation difficulty
- Imperfect implementation can still produce significant benefits
- Ease of implementation is directly correlated to effort expended prior to implementation and follow-up
- Champions are grown, not made
